Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

The frame house is a two-story frame structure constructed in a L-shape plan. It has a two-bay by two-bay main section with a two-bay ell. The main facade is symmetrically arranged with a central entrance and a full-length, one-story porch. The exterior is covered in a six-sided asphalt siding. The main ornamental treatment is the square posts and paneled railing on the porch. The structure appears to date from the late 19th century.

The property is located on the north side of Sandy Hook Road, approximately .13 mile west of Clark Road, in Sandy Hook. The house sits close to the road. The main facade faces south.

The two-story structure is constructed of frame and covered in asphalt shingles on a stone foundation. The main facade is symmetrically arranged with a central entrance. One-over-one windows on the outer bays of the first story and the two bays of the second story. The doors and windows have plain trim with a flat cornice. The full-length, one-story porch has a hipped roof supported by square posts and a paneled railing. There are corner boards on the corners of the house. The gable ends have one-over-one sash windows in each bay on each story. A four-pane window is in each gable. The east gable end has a concrete block flue. The ell projects slightly out from the east facade of the structure. On the east facade of the ell is a one-story entrance porch that is enclosed. The gable roof is covered in sheet metal.
